

**My Super Self!**

## Introduction

Our first topic this year is 'My Super Self!' where the children will learn about themselves.

The children will learn how they are all different and explore their 'super self' learning about what makes them special and unique.

To finish our topic, we will visit the National Portrait Gallery to find out about and explore portraits.

## Learning Overview

As scientists, they will learn about the human body and explore our main senses. They will explore and investigate animals, finding out about the features of different animal groups.

As geographers, they will learn about their school environment and the local area. They will think about where they live and create maps of the school and local area.

As writers they will use adjectives to describe characters and talk about their feelings. They will meet a fictional character called Charlie from 'Charlie's Superhero Underpants' and follow him on his journey to find his missing superhero underpants.

As artists, they will develop their skills in self-portraits and explore different face shapes.
